Westminster's racist scapegoating of refugees, asylum seekers and migrants has reached new lows—and 2024 will see an election where the governing party will plumb new depths to try and cling on to power.

The advance by the far-right continues in many countries, with the dismaying possibility of Trump standing to be US president again. Its growth goes hand in hand with a rise in Islamophobic and antisemitic ideas and attacks.

The UK government's response to events in Gaza has seen an intensification of Islamophobia with cabinet ministers trying to curb civil liberties and emboldening fascist groups. Encouraged by this mood, arch-racists like Nigel Farage oppose the call for Palestinian refugees to be housed in Scotland and link it to a rise in terrorism.

We say that ALL refugees are welcome here. Our movements have grounded the Rwanda plan, forced Suella Braverman's resignation and pushed back against the fascist right in our communities. Join us to say that every deportation, every new attack on refugee rights and every attempt to divide us will have anti-racists in their thousands fighting back.
